III. DETAILED ACTION

Claims 9-48, 54-80, and 86-93 are presented for examination.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 9-48; 54-80 and 86-93 are rejected under 35
U.S.C. 102(e) as being anticipated by Ockerman et al. (IEEE

Application/Control Number: 09/541,326

Art Unit: 2175

paper "Wearable computers for performance support: Initial Feasibility Study" 1997, pages 10-17 and Ockerman hereinafter).

Regarding Claims 9, 29 30, 39, 41, 54,63 and 78, Ockerman teaches displaying a list of context attributes available in the computer device (i.e. text...drawings...video) (page 12);

receiving user input identifying a subset of the displayed available context attributes for logging (i.e. earphone allows the user to hear) (page 12); and

selecting the identified context attributes for logging (i.e. applications allow the user to control...) (page 12).

Regarding Claim 10, Ockerman teaches wherein a proper subset of the display available context attributes are selected (i.e. by using the microphone...voice recognition...) (page 12).

Regarding Claim 11, Ockerman teaches wherein a single display available context attributes is selected (i.e. allows to user to hear) (page 12).

Regarding Claim 12, Ockerman teaches periodically storing...

(i.e. inherent by the performance support system on the wearable computer) (Abstract).

Regarding Claims 13-48, 54-80 and 86-93 the limitations of these claims are similar in scope and claim the same limitations to the rejected claims above and are therefore rejected as set forth above.

Art Unit: 2175

Conclusion

The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Diane D. Mizrahi whose telephone number is (703) 305-3806. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dov Popovici can be reached on (703) 305-3806. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-9000 for regular communications and (703) 305-9000 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-9001.
